

T100 – Insulated wire thermocouple extension harness.

Sample shown: T100-PT-K12-2T

T100- - -

For multiple pairs, use prefixes 4X, 5X, and 6X. All individual leads will be the same length, banded together.

1 – Connector: S – Molded on standard plug
 J – Standard jack
 M – Molded on mini plug
 MJ – Mini jack
 O – Open wire end, no connector option
 P – Standard connector not molded on
 MP – Mini connector not molded on
 T -Terminals (Specify Type)

4 – Calibration: E K J T

8 – Wire length: Length as measured from connector to connector in inches.

9 - Options: A – Stainless Steel Armor
 R – Stainless Steel wire overbraid over wires
 S – Shrink tubing

10 – Wire insulation: Specify wire gauge

2F – Fiberglass (305)
2G – High temperature fiberglass (321)
2T – Teflon FEP (507)
2K – Kapton (513)
2P – PVC (502)

For stranded wire specify 4F, 4T, 4K etc.
